PASSED AUDITS (11) Show

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

Links do not have a discernible name

This site uses cookies from Google to deliver its services and to analyze traffic.

Learn More. Ok, Got it.

These items highlight common accessibility best practices.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more about Google Search Essentials.

CRAWLING AND INDEXING

Links are not crawlable

To appear in search results, crawlers need access to your app.

This site uses cookies from Google to deliver its services and to analyze traffic.

Learn More. Ok, Got it.

Run these additional validators on your site to check additional SEO best practices.

3/4

Agentic Browsing

These checks ensure high-quality, browsable websites for AI agents and validate the correctness of WebMCP integrations. This category is still under development and subject to change.

AGENT ACCESSIBILITY

- Accessibility tree is not well-formed

These audits highlight best practices for improving the accessibility of the website for AI agents.

WEBMCP

- WebMCP form coverage — 77 forms missing annotations
- WebMCP tools registered

Audits validating WebMCP integration.
